Murgiplast

OUR COMPANY

Murgiplast is a family business, now in its second generation, which began its journey in the plastics sector in the 80s. We are dedicated to the manufacture of plastic containers for agriculture and horticulture (mainly planters and agricultural boxes), although we also manufacture technical parts for all types of industry. In addition to manufacturers we are also distributors of major brands such as TEKU and Klasmann peat among others.

We have 5,000 mts of factory and workshop facilities where we manufacture all our products. Our factory works 24 hours a day, 7 days a week to be always available to the needs of our customers. We also have a technical department with the latest technology for the manufacture of molds in which we can design and develop a project from the beginning. We can even make prototypes in our 3D printer.

Our warehouse and point of sale has more than 50,000 mts in which we keep a stock of practically all our products and this together with our fleet of trucks and vans allow us to give a fast and efficient response to each of our customers. In addition, we are the only warehouse of CC (the carts for the transport of ornamental plants) in Andalucía.

Our philosophy is continuous improvement, for that reason we have achieved the ISO 9001:2015 quality standard, which translates into an improvement of processes both in product quality and in the relationship with customers and suppliers.

On the other hand, we are fully committed to the environment, so we have installed photovoltaic panels in all our facilities thus achieving that much of the energy we consume comes from a renewable and green source. Also most of our machines are fully electric, thus reducing consumption by more than 40% compared to hydraulic machinery. In addition, we are authorized recyclers by the Junta de Andalucía (GRU - 5764; NIMA 0490000064) so that much of our material is recycled and recyclable except for products that by their use or utility is not recommended. With this we have managed to achieve a circular economy and close the circle of our raw material. All this together makes us reduce our carbon footprint significantly and contribute to create a more sustainable and responsible society.

We are gradually increasing our presence abroad by weaving alliances with business partners. Our constant evolution, effort and desire to improve make us an experienced and reliable partner for all our suppliers and customers.

HORTICULTURAL PRODUCTS

ALL SERIES

01 CULTIVATION - CC SERIES

Our cultivation series is designed for better drainage and greater ventilation at the base of the pot.

The new bottom, besides having a better drainage, is designed with more elevation to avoid root contact with the soil, thus reducing the risk of infections.

In all diameters you can choose between the containers, which are the high versions, or between the pots, low versions depending on the type of cultivation that best suits each pot.

In these formats we also have a wide variety of colors so that you can choose the best color for your plant.

01 CULTIVATION - CC SERIES

* The articles go on American pallets (1x1,20 mts).

* The box measures 60x40x50.

* Colors can be manufactured upon request in addition to the standard colors.

02 CLAY - CA/MA SERIES

Our Clay Series is designed with a matte and sandblasted finish to hide marks and scratches that may occur in the pot when growing. They are the ideal pots for outdoor cultivation or inside blocks precisely because of their sandblasted finish. In addition, this finish and color perfectly simulate a clay pot.

In all diameters you can choose between the containers, which are the tall versions, or between the pots, low versions depending on the type of cultivation that best suits each pot.

* The box measures 60x40x50 and the MCE series measures 60x40x30.

* Colors can be manufactured upon request in addition to the standard colors.

07 BERRIES - MBR SERIES

Our MBR series is mainly designed for the cultivation of berries.

It has a raised bottom at three heights with plenty of drainage to ensure total elimination of excess water. In addition, we have added markings to prevent spiralization, as well as grooves on the rim to insert the irrigation rubber bands.

08 SQUARE - MCU SERIES

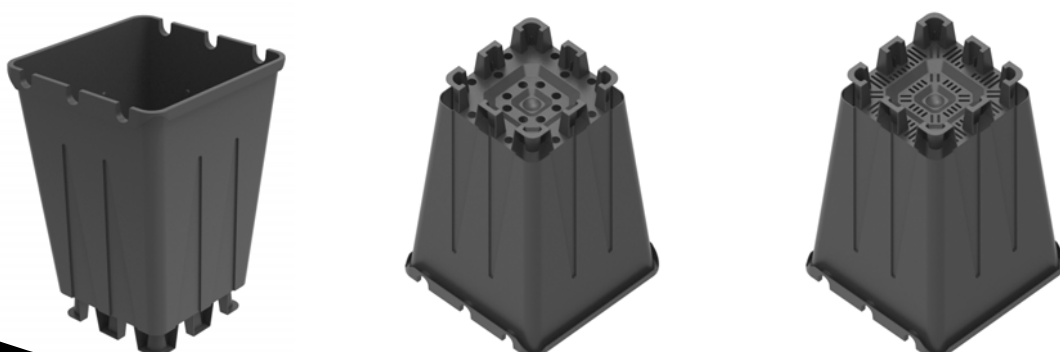

Our square pots are ideal for the cultivation of almond trees, olive trees, pistachio trees... with an anti root spiralization system. They also have a raised grid for ventilation. Due to its design you can save peat and space when cultivating.

09 SQUARE BERRIES - MCB SERIES

This series of square pots is specially designed for the cultivation of red fruits.

They have a great drainage and a raised bottom on legs that make them the ideal pots for this type of crops.

** The articles go on American pallets (1x1,20 mts).*

** The box measures 60x40x50x50.*

** Also available in a version with a grid bottom.*

10 HANGING - TC SERIES

Our series of oval shaped pots are specially designed to hang your plants with a reinforced edge with more ribs to support the weight of the pot. It is an ideal option to take advantage of spaces because with its hanger you can put your pot anywhere.

In the pots we also have a wide variety of colors so you can choose the best color that suits your plant.

11 HANGERS - CT SERIES

Our hangers are designed to offer the highest strength for hanging your pots and tubs with a reinforced hook area as well as an improved label attachment. In addition, the anchor leg is also reinforced and has a built-in pull-out tab.

You can choose from a wide range of colors to match the pots.

10 HANGING - TC SERIES

HANGING POTS	DIAMETER	LITERS	HEIGHT	LABEL SLOT	UNITS PALLET (HGT. 1,20 M)	UNITS PALLET (HGT. 2,20 M)	UNITS BOX	UNITS x CARRY TABLE

* The box measures 60x40x50x50.

* Colors can be manufactured upon request in addition to the standard colors.

12 SUPPORTS - SP SERIES

Our supports have one more leg than most on the market, making them stronger. The new shape of the ribs means that the plant does not suffer any internal damage and bagging is much easier, thus avoiding bag breakage.

13 SEED PICA - PS SERIES

We have a wide variety of colors in the spades, so you can differentiate each crop. In addition, it has a large area to write or put a label.

They have a height of 40 cm and a good fastening to nail them so that they do not fall down.

14 ARP SERIES

The definitive supports for your pots. It achieves total aeration of the pot and prevents it from touching the ground also avoiding risk of infections. Diameter of 18 cm with a total anchorage that adapts perfectly to our series of cultivation in addition to all other models.

15 TRAY - AS SERIES

SEED TRAY AND CELL BASKET

Our series of growing trays and their corresponding cell baskets are the perfect combination for your plantation. You can combine baskets of 6 and 12 cells in your 8-cavity tray.

The trays collect the drainage water left over from irrigation and make your work easier thanks to the order and comfort provided by their compartments.

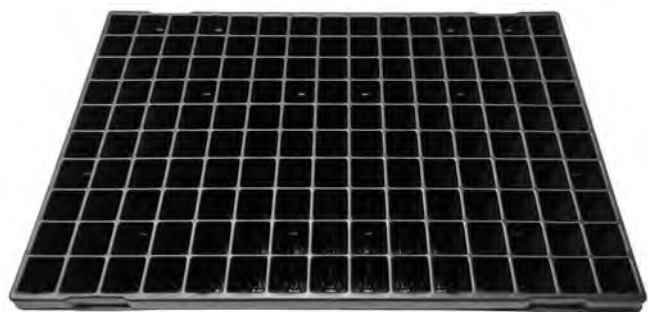

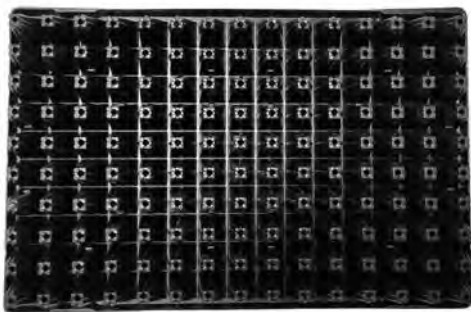

The cell baskets are perfect for the germination of all types of plants. With good drainage and the exact firmeza for an agile and simple transplanting.

16 TRAY - QPE SERIES

This thermoformed tray of 150 cells is designed for multi-crop seasons thanks to its great thickness and resistance.

With this format, cork trays are not necessary.

17 IRRIGATION TRAY

Growing trays that collect excess water from irrigation and allow flood irrigation. We also have the version with holes for drainage.

15 & 16 TRAYS - AS & QPE SERIES

Murgiplast

AGRICULTURAL PRODUCTS

ALL SERIES

BOXES

Plastic boxes for agricultural use are a fundamental pillar in the production of Murgiplast. We have a wide range of models of plastic crates for all types of fruits and vegetables.

We are experts in the manufacture of various types of boxes for vegetables and fruits with an extensive experience of more than 30 years supplying to cooperatives and meat processing plants in Almeria.

With all the necessary certifications, we work to create the best boxes on the market.

These solid boxes with grids are specially designed for the transport and storage of vegetables and fruit. Another feature is that they are stackable, which saves space and facilitates the palletized transport of large quantities.

Durability is another of our priorities, that is why we manufacture our boxes with a strong and resistant structure, so that they allow several uses and the protection of the goods to be transported is guaranteed. We have subjected all our agricultural crates to various stress and resistance tests to ensure their durability in the face of temperature changes in cold storage and weather changes, as well as the continued use of a heavy workload.

Thanks to our engineering department and in-house workshop, we have perfected our boxes with the ideal weight to tolerate the weight of the load without deformation and an agile and dynamic handling. We have also focused on providing rounded grids and edges without files so as not to damage the fruit being transported.
